

Pruning Shear Set with Bypass and Anvil Pruners

This cutting combo features two distinct pruning tools designed for various gardening tasks. The first tool is a bypass pruner, characterized by its scissor-like cutting action, ideal for making clean cuts on living plants, while the second tool is an anvil pruner, which employs a single blade that closes onto a flat surface, best suited for cutting dead or dry wood.

Product Overview

Versatile Pruning Solution

This 2-piece cutting combo set includes both bypass and anvil pruners, providing a comprehensive solution for various gardening and maintenance tasks. The bypass pruner is engineered for clean, precise cuts on living stems, while the anvil pruner is optimized for cutting dead or woody material. Both tools feature high-carbon steel blades for durability and ergonomic dip grips to ensure comfort during extended use.
