

PT500BAR Industrial Ball Valve

This industrial ball valve is designed for high-pressure fluid control. It has a pressure rating of PT500BAR and a maximum temperature of 80°C, and is marked with CE0036 certification.

Overview

High-Performance Industrial Ball Valve

The PT500BAR Industrial Ball Valve is engineered for demanding high-pressure fluid control applications. Designed with robust materials to withstand extreme operational conditions, this valve ensures reliable performance and safety. It features critical certifications, including CE0036, making it a suitable choice for professional industrial fluid management systems.
