Product Overview

Compact PTC Heating Solution

The VP 12 Ceramic Electric Heating Fan provides rapid and consistent heat distribution using advanced PTC (Positive Temperature Coefficient) technology. Designed for versatility and safety, it features a durable alloy frame with a stylish log handle for portability. With three distinct heating levels, it is an ideal solution for efficient personal climate control in indoor environments.

Technical Specifications

Power Settings

18 W Cool Wind	600 W Warm Wind	900 W Hot Wind
--------------------------	---------------------------	--------------------------

Voltage/Frequency

220V/50Hz

Safety and Design

Materials

- Log handle
- Alloy frame

Safety Features

Dump power off, PTC Ceramic Heating, Heat-resistant materials

Dimensions and Logistics

Physical Dimensions

Item	Dimensions (mm)
Product	180*167*274.5
Unit Package	237*227*334
Master Package	478*468*350

Weight Information

1.85 kg
Net Weight

2.8 kg
Gross Weight
