

PTC Ceramic Fan Heater with Overheat Protection

This PTC ceramic fan heater provides efficient and rapid space heating. It includes tip-over and overheat protection for safe operation.

Product Overview

Efficient space heating for modern home and office environments.

Efficient PTC Heating Technology

This PTC Ceramic Fan Heater provides rapid and consistent warmth using advanced ceramic heating elements. Designed for indoor environments like homes and offices, it features a robust build with integrated safety mechanisms, including overheat protection and a built-in fuse. The fan-assisted convection ensures even heat distribution, while user-friendly controls allow for convenient operation.

Technical Specifications

Engineered for energy efficiency and reliable temperature control.

Power Performance

1500 W
Power Consumption

Voltage Configuration

Region	Specification
North America	AC110-120V, 60Hz
International	AC220-240V, 50Hz

Construction & Safety

Robust construction with self-regulating ceramic heating elements.

Housing Material

ABS

Safety Features

Tip-over protection, Over-heat protection, Built-in fuse
