

PTC Ceramic Space Heater with Oscillation

This ceramic space heater utilizes Positive Temperature Coefficient (PTC) technology for rapid and consistent heat output. The unit features automatic oscillation and a tip-over switch for safety.

Product Overview

Efficient PTC Heating Solution

This PTC ceramic space heater utilizes advanced Positive Temperature Coefficient technology to deliver rapid and consistent heat output for professional and residential environments. Designed as a compact, stable tower unit, it ensures targeted warmth with integrated oscillation for even heat distribution. Engineered with safety as a priority, the device features both overheat protection and a built-in tip-over switch for reliable daily use.

Technical Specifications

Heating Technology	PTC (Positive Temperature Coefficient) Ceramic
Oscillation	Yes
Design Type	Tower

Safety Features

Safety Compliance	Overheat Protection, Tip-over Switch
-------------------	--------------------------------------

Applications

Recommended Settings

- Office spaces
- Residential rooms
- General indoor heating
