

# PTC Ceramic Tower Heater with Digital Controls

This tower-style heater features a PTC (Positive Temperature Coefficient) ceramic heating element for safe, energy-efficient operation. Its compact design includes a digital display for temperature and mode settings, overheat protection, and a tip-over switch.

## Product Overview

### Efficient PTC Heating Solution

This tower-style PTC ceramic heater is designed for professional and residential environments requiring consistent, safe, and efficient heating. Featuring a high-performance 3300W output with adjustable heat settings, the unit provides rapid warmth through its automatic oscillation system. With an integrated digital display, remote control, and multiple safety features including overheat protection, it offers a reliable climate control solution for any room.

## Technical Specifications

### Performance Metrics

**3300 W**

Max Power

**3000 W**

High Setting

**2000 W**

Low Setting

### Operation Modes

- Fan only
- Warm air
- Hot air

### Electrical Requirements

220-240V, 50Hz

## Features & Control

### Safety Protections

Thermal Cut-out • Overheat Protection

### Control Options

- Manual Control Panel
- Remote Control
- LED Temperature Display
- 8-Hour Timer

## Logistics

### Container Load Capacity

Container Type	Load Quantity
20' Container	210
40' Container	460
40' HQ	460
