

PTC Electric Space Heater with Thermostat

This electric space heater offers two heating power options: 1000W or 2000W. It includes an adjustable thermostat with three settings and overheat protection.

Overview

Professional PTC Space Heater

This high-efficiency PTC electric heater offers two distinct heating modes to suit your climate control needs. Designed with safety and convenience in mind, it features automatic oscillation for even heat distribution and intuitive digital controls. Ideal for offices and workspaces, it includes multiple safety measures such as an overheat protection device and a tip-over safety switch.
