

PTC Space Heater for Home Use

This space heater is designed for household use. It utilizes Positive Temperature Coefficient (PTC) heating elements for efficient and safe heat generation.

Product Overview

Efficient PTC Heating Technology

The PTC Space Heater is a versatile household heating solution designed for supplemental warmth in small to medium-sized rooms. It leverages advanced Positive Temperature Coefficient heating elements to provide consistent, safe, and efficient heat generation. The unit is engineered for portability and ease of use, featuring an integrated handle and a user-friendly top-mounted control panel.

Key Features

Design & Convenience

- Vertical orientation for space-saving
- Top-mounted control interface
- Portable design with integrated handle
- Stable base for secure placement

Technical Details

Technology Type	PTC Heating Element, Residential Grade
Application	Household space heating for small to medium-sized rooms
