

PTFE Thread Sealing Tape 16m x 0.08mm

This PTFE thread seal tape is commonly used in plumbing to create a tight seal on pipe threads. It is also suitable for sealing threaded connections in hydraulic and pneumatic systems.

Product Overview

Professional PTFE Thread Sealing Tape

This premium PTFE thread sealing tape, widely recognized as Teflon tape, is an essential tool for high-reliability plumbing and mechanical applications. Engineered from durable polytetrafluoroethylene film, it provides a superior, leak-proof seal for threaded connections in water, hydraulic, and pneumatic systems. The spool-ready design ensures quick and precise application on pipe threads, making it a reliable solution for professional trade and industrial maintenance.

Technical Specifications

Total Length	16 m
Thickness	0.08 mm
Material	PTFE, Polytetrafluoroethylene

Applications

Common Industrial Uses

- Plumbing pipe threading
- Hydraulic system sealing
- Pneumatic connections
