### Automated Snack Production Solution

This fully automated production line is designed for the efficient, continuous manufacturing of diverse puffed snack foods. It seamlessly integrates mixing, extrusion, shaping, drying, and flavoring into a single, streamlined operation. With its versatile design, operators can easily switch molds to produce a wide array of shapes and even core-filled snacks, making it an ideal solution for modern food processing facilities.

**Material Construction**

Food-grade stainless steel

## Technical Specifications

### Production Capacity

**500 kg/hr**  
Max Output

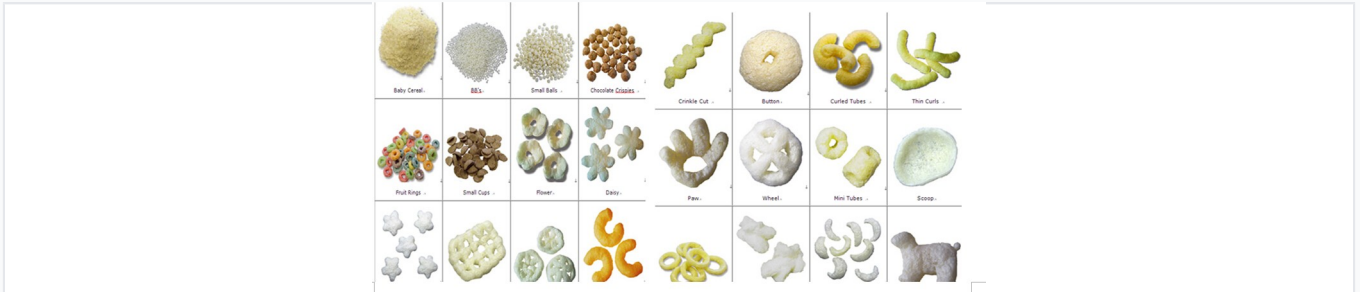

### Process Stages

- Mixing
- Extruding
- Shaping
- Cutting
- Drying
- Flavoring

### Control System

PLC Control with user-friendly interface

## Production Capabilities

Diverse output capabilities including rings, balls, tubes, and specialty shapes.

### Available Snack Shapes

Rings • Flowers • Balls • Strips • Moons • Stars • Tubes • Hearts • Wheels • Fruit Loops

### Compatible Ingredients

Corn, Rice, Wheat, Oat, Barley

### Specialty Capabilities

Yes
