

Pulp Paper Rolls for Electronic and IT Applications

High-quality pulp paper rolls are suitable for various electronic and IT product applications. The paper offers excellent tensile strength and consistent thickness, ensuring optimal performance in demanding environments.

Product Overview

Professional Grade Pulp Paper

These high-quality pulp paper rolls are engineered specifically for electronic and IT applications. Designed for superior tensile strength and consistent thickness, the paper ensures optimal performance and reliable feeding in high-demand printing and plotting environments. It features a specialized uniform coating that provides excellent conductivity for specialized technical tasks.

Technical Specifications

Customization

- Custom widths available
- Custom lengths available

Coating	Uniform coating
Electrical Conductivity	Yes
Ideal Applications	Printers, Plotters, Electronic Devices, IT Hardware
