

Pulse Start Uniform Metal Halide Lamp

This pulse start uniform metal halide lamp is designed for high-intensity lighting applications. The HQI.PS lamp offers enhanced energy efficiency, improved color rendering, and a longer lifespan compared to traditional metal halide lamps.

Product Overview

High-Efficiency Lighting Solution

The Pulse Start Uniform Metal Halide Lamp is a high-intensity lighting solution engineered for demanding commercial, industrial, and architectural environments. Featuring advanced pulse-start technology, this lamp delivers superior energy efficiency and improved color rendering compared to traditional metal halide counterparts. Its uniform light distribution capability ensures consistent, reliable illumination throughout the target space, backed by an extended operational lifespan.

Key Features

Product Advantages

- Pulse-start technology for enhanced energy efficiency
- Improved color rendering index
- Extended service life
- Uniform light distribution pattern

Application Areas

Suitable Environments

Commercial Lighting, Industrial Facilities, Architectural Lighting
