Product Overview

Professional Grade Pulverizing Mill Bowl

This pulverizing mill bowl features a high-performance 'bowl and disc' grinding head, widely trusted in leading commercial assay laboratories. Engineered for demanding industrial applications, it offers exceptional durability through its through-hardened steel construction. Designed for consistent and precise milling, this component is an essential tool for high-volume sample processing.

Technical Specifications

Nominal Capacity	5000 cc
Total Weight	60.5 kg
Compatible Mills	LM2, LM5000

Operational Metrics

Recommended Sample Mass

1000 g
Minimum

3500 g
Maximum

Material & Construction

Available Finishes

Standard Steel • Chrome Steel

Construction	Through-hardened steel
