

Pump Control Box for Motors up to 1.5kW

This control box is designed for single-phase pumps with motor power up to 1.5kW. It provides manual operation and ensures reliable operation and protection for the pump.

Product Overview

Professional Pump Control Solution

This manually operated single-phase control box is engineered to provide reliable management for pump motors with a power capacity up to 1.5 kW (2 HP). Designed for seamless integration and ease of use, it provides a stable electrical environment to ensure pump longevity. It adheres to international quality and safety benchmarks to meet demanding industrial and commercial application requirements.
