

Pump for fluid transfer

This pump offers reliable performance and strong adaptability. It demonstrates corrosion resistance and minimal loss during operation.

Product Overview

High-Efficiency Oil Well Pump

The CYB25-225 TH is a newly developed tube pump engineered to meet evolving market demands for enhanced efficiency and extended overhaul periods. Built for durability in challenging environments, this pump offers excellent corrosion resistance and wear characteristics. Its reliable performance and strong adaptability make it a versatile choice for fluid transfer operations requiring minimal loss.

Key Features

Performance Benefits

Corrosion Resistant, Wear Resistant, Reliable Performance, High Adaptability, Low Loss

Technical Specifications

Model	CYB25-225 TH
Type	Tube pump
Primary Application	Oil well fluid transfer
