

Push-Fit Pipe Coupling

This push-fit coupling allows for quick installation without soldering, clamps, or glue. It is suitable for potable water and hydronic heating applications and compatible with PEX, copper, CPVC, and PE-RT pipes.

Product Overview

Versatile Push-Fit Solution

This brass push-to-connect fitting offers a reliable and efficient alternative to traditional plumbing connections. Engineered for seamless integration, it eliminates the need for soldering, clamps, unions, or glue. Its robust construction makes it an ideal choice for both residential and commercial potable water and hydronic heating systems.

Technical Specifications

Installation Features

- No soldering required
- No glue or clamps needed
- Tool-free installation
- Leak-proof secure connection

Suitable Applications

Potable Water • Hydronic Heating • Residential Plumbing • Commercial Plumbing

Material Composition

Lead-free DZR brass

Compatible Pipe Materials

PEX, Copper, CPVC, PE-RT
