

Push-Type Concrete Scarifier with Scabbler Head

This push-type concrete scarifier is designed for surface preparation and concrete reduction. It features a multi-head scabbling system to effectively remove coatings and level surfaces.

Product Overview

Professional Concrete Scabbler

The OK-P11A is a powerful, hand-push concrete scabbling machine designed for heavy-duty surface preparation. It is engineered to remove concrete laitance, epoxy coatings, and damaged surfaces while achieving uniform roughness for new pavement. With its versatile operation on horizontal, vertical, and cambered surfaces, this tool significantly enhances project efficiency and reduces labor costs.

Technical Specifications

Total Weight	76 kg
Impact Frequency	24200 times/min
Hair Cutting Width	283 mm

Performance Metrics

Key Operational Metrics

40 sqm/h Max Chiseling Capacity	10 mm Max Chiseling Depth	35 mm Chisel Head Diameter
Recommended Concrete Strength	C30-C40	

Applications

Suitable Environments	Highway, Bridge Deck, Airport, Parking Structures, Tunnel Construction, Power Plants, Dam/Reservoir Repair
