

PVC DWV Double Wye Plumbing Fitting

The PVC DWV Double Wye is a plumbing fitting for drain, waste, and vent (DWV) systems. Constructed from durable PVC, it provides resistance to corrosion and facilitates efficient merging of waste streams while preventing clogs.

Product Overview

Professional PVC DWV Double Wye

The PVC DWV Double Wye is a professional-grade plumbing fitting engineered specifically for drain, waste, and vent (DWV) systems. Its robust construction provides exceptional resistance to corrosion and common chemicals found in high-demand drainage environments. Designed with two branches for efficient waste stream merging, it ensures optimized flow and clog prevention in residential and commercial plumbing installations.

Technical Specifications

Standards

DWV Industry Standard

Key Features

- Corrosion resistant material
- Chemical resistant construction
- Dual-branch design for efficient flow
- Compatible with standard PVC piping

Material	Durable Polyvinyl Chloride (PVC)
Primary Application	Drain, Waste, Vent
