

# PVC Electrical Insulation Tape

This PVC electrical tape is designed for a wide range of applications, providing electrical insulation and mechanical protection. It is suitable for splicing wires, cable harnessing, and general insulation purposes.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Electrical Insulation

This premium PVC electrical tape provides excellent insulation, mechanical strength, and superior adhesion for professional wire and cable applications. Designed for safety and reliability, it is flame retardant and suitable for environments requiring strict fire prevention. With high flexibility and conformability, it ensures a secure, long-lasting bond in temperatures ranging from 0°C to 80°C.

## Technical Specifications

### Performance Metrics

**20 N/cm**

Tensile Strength

**150 %**

Elongation

**40 kV/mm**

Electrical Strength

### Detailed Properties (Model 2130)

| Property            | Value    |
|---------------------|----------|
| Thickness           | 0.13 mm  |
| Tensile Strength    | 20 N/cm  |
| Elongation          | 150%     |
| Electrical Strength | 40 kV/mm |
| Peel Adhesion       | 1.8 N/cm |

## General Information

### Operating Limits

- Max Voltage: 600V
- Temperature Range: 0°C to 80°C
- Optimal Installation Temperature: Above 10°C

### Standard Lengths

- 5m
- 10m
- 15m
- 20m
- 33m

### Colors

Black, White, Blue, Green, Red, Yellow
