

PVC Extrusion Line for Wire and Cable Production

This product is a PVC extruder line designed for the production of single-core wire and flat cables, specifically H05 cables. A twisting machine is included, which is suitable for processing copper wires used in flexible cable manufacturing.

Overview

High-Efficiency Cable Production Solution

This professional-grade PVC extrusion line is engineered for the precise manufacturing of single-core wires and flat cables, including H05 cable specifications. The system integrates advanced extrusion technology with a specialized twisting machine, making it an ideal choice for high-quality flexible cable production. Designed for versatility, the line supports a wide range of extruder sizes to accommodate varying production requirements.

Technical Specifications

Compatible Cable Types

- Single-core wire
- Flat cables
- H05 cables

Available Extruder Models

30, 45, 65, 70, 90, 120, 150, 200

Twisting Machine Specs

Copper Wire Diameter Range

0.1 mm

Minimum Diameter

0.4 mm

Maximum Diameter

Primary Application

Flexible Cable Manufacturing
