

# PVC Flexible Ventilation Duct with Black Sleeve and Buckle

PVC flexible duct is made to supply and exhaust hot air for the confined spaces. It features a black sleeve and buckle for secure connections.

## ADDITIONAL IMAGES

## Product Overview

### Professional Flexible Ventilation Solutions

This PVC flexible ventilation duct is engineered for demanding industrial environments, featuring fire-resistant fabric capable of withstanding temperatures up to 150°C. Reinforced with helix steel wire and a protective black sleeve, it offers superior durability, wear resistance, and flexibility for easy deployment. The integrated buckle system ensures rapid, secure connection to fans and blowers, making it an essential tool for confined space maintenance, fume extraction, and fresh air supply.

## Technical Specifications

### Available Lengths

- 5m
- 10m

Diameter Range	100mm - 1500mm
----------------	----------------

Max Temperature	150 °C
-----------------	--------

## Performance Features

Material Characteristics	Fire-resistant, Oleic acid proof, Wear-and-tear proof, Flexible, Lightweight
--------------------------	--

## Ordering Information

### Services

OEM Available • Custom Sizes Available

Minimum Order Quantity	100 PCS
