

PVC Floor Mat Calendering Line

This PVC floor mat calendering line is designed for continuous production. The system includes feeding, calendering, cooling, embossing, and winding units for efficient operation.

Product Overview

High-Efficiency PVC Floor Mat Production

This PVC floor mat calendering line is engineered for the continuous manufacturing of high-quality flooring materials with precise thickness control. The system integrates material feeding, advanced calendering, cooling, and embossing stations to produce versatile patterns like diamond, strip, and dot shapes. Designed for industrial efficiency, it offers robust construction to ensure uniform thickness and consistent surface finishes for various flooring applications.

Technical Specifications

Thickness Range	1.5 mm
Maximum Thickness	4 mm

Product Capabilities

Compounding Options

- Standard PVC Sheet
- Compound Carpet

Surface Patterns	Pane, Tooth Shape, Diamond Shape, Strip Shape, Dot Shape
