

PVC Foam Sheet

This high-density PVC foam sheet is suitable for cushioning, insulation, or surface protection. The durable and flexible material offers excellent shock absorption and resistance to moisture.

Product Overview

High-Density PVC Foam Solution

This high-density PVC foaming sheet is a versatile material engineered for superior cushioning, thermal insulation, and surface protection. Featuring a fine, closed-cell structure, it delivers excellent shock absorption and moisture resistance for demanding professional applications. It is an ideal choice for electronics packaging, sound dampening, and custom crafting projects.

Technical Specifications

Material Composition	PVC (Polyvinyl Chloride) Foam
Cell Structure	Closed-cell

Key Features

Material Benefits	Shock Absorption, Moisture Resistant, Durable, Flexible, Insulating
-------------------	---

Applications

Recommended Use

- Electronic component packaging
- Sound dampening/Acoustics
- Industrial cushioning
- Surface protection
- Crafting projects
