

PVC Pipe and Fitting Injection Mold

This injection mold is designed for manufacturing PVC pipes and fittings. It features intricate cavities and core components for producing various pipe and fitting geometries.

Product Overview

Precision PVC Injection Mold

This high-performance plastic injection mold is engineered specifically for the efficient manufacturing of PVC pipes and fittings. Constructed with premium steel for the core and cavity, it ensures exceptional durability and consistent part quality across long production cycles. Designed for industrial-scale operations, this mold offers reliable dimensional accuracy and tight tolerances to meet rigorous manufacturing standards.

Technical Specifications

Core & Cavity Steel	P20, 2316, 718, 2738
Mould Base	S45C
Runner System	Cold runner

Performance & Durability

Mould Lifetime

8500000 shots

Max Shots

Warranty

One year warranty with lifelong after-sales services

Logistics & Shipping

Container Specifications

Container Type	Dimensions	Max Weight
20 Foot	5.90m x 2.34m x 2.38m	17.5 T
40 Foot	11.95m x 2.34m x 2.38m	22 T

Packaging

- Exported wooden case
- PP packing bags

Commercial Terms

Quality Certifications

ISO9001:2008

Minimum Order Quantity

1 set

Price Terms

FOB Ningbo

Delivery Time

50 days
