Machine Overview

Professional Shrink Sleeve Sheeting

This PVC shrink sleeve label sheeting machine is engineered for high-precision cutting in high-volume industrial environments. It integrates advanced tension control and servo-driven traction systems to ensure clean, accurate results across various label specifications. With a robust 16mm steel frame and automated collection features, it provides a stable and efficient solution for professional label processing lines.

Mechanical Components

Unwinding System

- Integrated web-guiding function
- Air shaft material roll lock
- Magnetic brake for tension control

Frame Thickness	16 mm
-----------------	-------

Drive and Control

Drive Mechanism	Servo Motor Drive, Timing Belt Transmission
Tension Control	Yes

Cutting and Accuracy

Tracking Sensor	Print mark tracking sensor
Traction Pressure	Pneumatic pressing system

Output System

Collection Table	Extendable movable conveyor belt with adjustable delay time
