

PVC Vacuum Membrane Press for Cabinet Doors

This PVC vacuum membrane press is designed for applying PVC film to cabinet doors and furniture panels. It utilizes a vacuum and heating system to ensure uniform adhesion and a smooth, wrinkle-free finish.

Overview

Professional PVC Vacuum Membrane Press

This high-quality PVC vacuum membrane press machine is engineered for applying PVC film to cabinet doors, furniture panels, and various wood-based components. It utilizes an advanced vacuum system to ensure uniform adhesion, resulting in a smooth, wrinkle-free finish on complex surfaces. Featuring robust construction and automated controls for precise temperature and pressure management, this machine offers the reliability and versatility required for professional woodworking production environments.

Technical Specifications

Worktable Inner Size

- 2550 x 1100 mm
- 2550 x 1300 mm

Overall Dimensions	5500 x 1400 x 1300 mm
Max. Working Thickness	50 mm

Performance Metrics

Rating Working Pressure	-0.09 Mpa
Total Power	18.5 kw
Actual Power Consumption	8 kw

Physical Properties

Net Weight	1100 kg
Voltage	Customized
