

Qsb5.9 Engine Piston

This high-performance piston is designed for Qsb5.9 engines and provides optimal combustion efficiency. It is precision-machined with advanced materials to withstand high temperatures and pressures, offering superior wear resistance and extended engine life.

Product Overview

High-Performance Engine Piston

This premium engine piston is engineered specifically for Qsb5.9 construction machinery engines. Designed for optimal combustion efficiency and durability, it is manufactured to meet rigorous performance standards. Its robust construction ensures superior wear resistance and extended service life in demanding industrial environments.

Technical Specifications

Part Number	D4934860
Application	Construction machinery
Material	Aluminum

Physical Metrics

Dimensions

1.4 kg
Weight

11 cm
Width

12 cm
Height

Logistics & Warranty

Quality Grade

Aftermarket

Delivery Methods

- By sea
- By air
- By express

Warranty

6 months
