

Quad-Core 2.8 GHz Desktop Computer

This desktop computer features an Intel Core i5-2300 quad-core processor with a 2.8 GHz clock speed. It is designed for reliability and stability in industrial and professional environments.

Product Overview

High-Performance Computing Solution

The Quad-Core 2.8 GHz Desktop Computer is a high-performance system engineered for demanding professional and industrial applications. It features a robust enclosure designed for stability and reliability in rigorous environments. With convenient front panel access and comprehensive rear connectivity, this desktop provides a versatile platform for specialized technical tasks.
