

Quarry Cutting Circular Saw Blank

This large circular saw blank is designed for quarry-cutting applications. It features a toothed outer edge for efficient material removal and a reinforced central hub for secure mounting.

Product Overview

Industrial Quarry Cutting Solutions

This high-strength steel alloy circular saw blank is precision-engineered for demanding quarry environments. Featuring specialized teardrop-shaped cutouts, it ensures optimal cooling and stress distribution during heavy-duty stone and rock cutting applications. The reinforced central hub provides superior durability and power transmission, making it a reliable choice for professional stone extraction.

Technical Specifications

Material	High-strength steel alloy
Design Features	Teardrop cooling cutouts, Reinforced central hub, Toothed outer edge

Application

Primary Applications

- Quarry stone extraction
- Hard rock cutting
- General masonry material processing
