

Quarter-Turn Electric Valve Actuator

This electric actuator is designed for quarter-turn valves, such as ball valves and butterfly valves. It features IP67 protection and explosion-proof grade ExdaBT4.

Product Overview

Industrial Valve Control Solution

The SMC/HBC series electric actuators are engineered for high-performance control of large-diameter ball and butterfly valves. Featuring a robust design with a manual handwheel override, these units ensure reliable and repeatable valve positioning in demanding industrial environments. Equipped with clear position indicators, they facilitate efficient remote monitoring and manual operation for critical flow control applications.

Technical Specifications

Protection Class

IP67

Compatible Valve Types

- Large-diameter ball valves
- Large-diameter butterfly valves

Explosion-Proof Grade

ExdaBT4

Operation & Features

Key Operational Features

Manual Handwheel Override, Visual Position Indicator, Remote Control Capable
