Product Overview

Quarter-Turn Electric Valve Actuator

This industrial-grade electric actuator is engineered for precise and reliable control of quarter-turn valves including butterfly, ball, and cock valves. Designed for demanding environments, it features a robust construction and an integrated manual override handwheel for emergency operation. With a high protection rating and explosion-proof certification, it ensures safety and efficiency in automated flow control applications.

Technical Specifications

Protection Class

IP67

Explosion-proof Grade

ExdIBT4

Valve Compatibility

Butterfly Valve, Ball Valve, Cock Valve

Operational Features

Manual Override

Yes

Feedback System

Limit switch feedback system
