

Quartz Radiant Space Heater

This indoor space heater uses quartz radiant technology. It features a portable design with a protective metal grill and integrated handle.

Overview

Efficient Indoor Heating

This quartz radiant space heater is engineered to provide immediate, localized warmth for indoor environments. Featuring a compact, portable design with an integrated handle, it is an ideal solution for supplemental heating during colder seasons. The unit utilizes multiple quartz elements protected by a robust metal grill, ensuring both safety and consistent heat distribution.

Design & Build

Housing Finish	Silver-colored housing
Portability Features	Integrated handle, Lightweight design
Base Style	Circular base with blue accents

Heating Performance

Heating Technology	Quartz radiant elements
Heating Elements	3 elements

Safety & Control

Safety Features

- Protective metal grill
- Base-mounted control panel

Recommended Usage

Indoor Use • Localized Heating
