

# Quartz Space Heater

This space heater uses quartz heating elements to efficiently provide warmth. It features a protective grill and multiple power settings for adjustable heat output.

## Product Overview

### Efficient Localized Heating

The Quartz Space Heater DF188A is a compact, high-efficiency heating solution designed for indoor environments. Utilizing advanced quartz elements, it delivers rapid, targeted warmth to localized spaces. With adjustable power settings and an integrated safety grill, this unit balances performance with essential user protection for various room applications.

## Technical Specifications

### Safety Features

- Protective safety grill
- Touch-prevention design

Heating Technology	Quartz Element
Recommended Use	Indoor, Household

## Performance

### Power Modes

Adjustable Heat Output

Energy Efficiency	Yes
