

Quartz Tower Heater with Adjustable Power

This portable quartz tower heater provides efficient and localized warmth. It features multiple quartz heating elements and adjustable power settings, enclosed in a sturdy metal frame with a safety grill and caster wheels.

Product Overview

Efficient Heating Solution

The Quartz Tower Heater is a portable heating solution designed for efficient and localized warmth. Featuring multiple quartz heating elements, this heater provides rapid heating with adjustable power settings controlled by individual switches. The unit is enclosed in a sturdy metal frame with a safety grill to prevent accidental contact with the heating elements, making it suitable for use in homes, offices, and other indoor spaces.
