

Quartz Tube Space Heater

This space heater uses either a quartz or carbon heating tube for instant warmth. It features a double safety device, overheat protection, and energy-saving operation with 70-degree oscillation.

Product Overview

High-Efficiency Radiant Heating

This quartz radiant space heater provides rapid, targeted warmth for small to medium-sized rooms. Engineered for efficiency, it utilizes advanced quartz elements to deliver immediate heat upon activation. Designed with user safety and portability in mind, it is a versatile and cost-effective supplemental heating solution for various professional and commercial spaces.

Key Features

Product Highlights

- Rapid heat-up quartz elements
- Directional heating technology
- Integrated safety grill
- Portable design with carrying handle
- Stable base for secure placement
