

Quick Connect Fitting for Pneumatic and Fluid Systems

This precision-engineered quick connect fitting ensures seamless and secure connections in pneumatic and fluid transfer systems. It is constructed from high-grade metal, providing durability and resistance to corrosion.

Product Overview

Professional Quick Connect Solutions

This precision-engineered quick connect fitting is designed for seamless, secure integration into pneumatic and fluid transfer systems. Constructed from high-grade metal, it offers exceptional durability and robust resistance to corrosion for demanding industrial environments. The inclusion of a knurled grip ensures easy manual handling, while the advanced locking mechanism guarantees reliable, leak-proof performance across various applications.

Technical Specifications

Material Composition	High-grade metal
Design Features	Knurled Grip, Locking Mechanism, Corrosion Resistant, Leak-proof

Applications

Suitable Industries

- Pneumatic Systems
- Fluid Transfer Systems
- Industrial Machinery
- Automotive Applications
