

Quick Release Bar Clamp and Spreader

The Quick Release Bar Clamp and Spreader is a versatile tool designed for clamping and spreading applications. It features a quick-release mechanism for easy adjustments and secure holding.

Product Overview

Versatile Clamping and Spreading Solution

The Quick Release Bar Clamp and Spreader is a professional-grade tool engineered for both clamping and spreading applications. Designed with a robust quick-release mechanism, it allows for rapid adjustments and secure, reliable holding power. Its ergonomic handle design ensures comfort during extended use, making it an essential addition for woodworking, metalworking, and complex assembly tasks.

Technical Specifications

Key Features

- Quick-release mechanism for rapid adjustment
- Ergonomic handle design
- Adjustable bar for versatile workpiece sizing
- Durable construction for heavy-duty applications

Model Number	HC-04
Functionality	Clamping, Spreading

Applications

Suitable Industries

Woodworking • Metalworking • DIY Projects • General Assembly
