Quick Release Drill Press Vise 70x60mm

This precision-engineered quick-release drill press vise is designed for secure and accurate workpiece holding. Constructed from durable materials, this vise features a smooth-action screw mechanism for effortless clamping and releasing.

Product Overview

Professional Precision Workholding

This precision-engineered quick-release drill press vise is designed for secure and accurate workpiece holding during demanding machining operations. Constructed from durable materials, the unit features a smooth-action screw mechanism that allows for effortless and rapid clamping and releasing. Its stable design effectively minimizes vibration, ensuring improved accuracy and a superior surface finish for drilling and tapping tasks.

Technical Specifications

Jaw Width	70 mm
Clamping Capacity	60 mm
Model Number	802101

Key Features

Core Features

- Quick-release mechanism for rapid workflow
- Compact design for drill press table compatibility
- Vibration-reducing construction for high-precision results
- Smooth-action screw for consistent pressure

Applications	Drilling, Tapping, Machining
