

Quick Release Hose Clamp

This is a quick release hose clamp. It is designed for securing hoses and tubes.

Product Overview

Professional Hose Connection Solutions

These high-quality stainless steel quick-release hose clamps are engineered to meet diverse mechanical connection needs. Featuring a robust design and a user-friendly quick-release mechanism, they provide superior sealing performance and high tightening force. They are versatile components essential for automotive, maritime, chemical, and industrial equipment maintenance and assembly.

Technical Specifications

Material	Stainless steel
Key Features	Quick release mechanism, High sealing performance, Corrosion resistant, Adjustable design

Applications

Primary Applications

- Vehicles and automotive systems
- Marine and ship equipment
- Diesel and gasoline engines
- Machine tools
- Firefighting equipment
- Chemical processing equipment
- Nylon and TPU hose connections
