

Quinoa Seed Cleaning and Washing Machine

This equipment includes a pneumatic hoist, a quinoa cleaning machine, and a drying conveyor. It is suitable for processing quinoa seeds, sesame seeds, oats, wheat, and other similar grains.

Product Overview

Industrial Quinoa Processing Solution

This industrial-grade cleaning and washing system is designed for high-efficiency processing of quinoa, sesame seeds, oats, and wheat. The integrated line features a pneumatic hoist for gentle transport, a gravity-based washing unit for sand removal, and a specialized drying conveyor. Engineered for durability and hygiene, this equipment helps processors maintain quality while minimizing seed breakage.

Technical Features

Key System Components

- Pneumatic hoist
- Quinoa cleaning machine
- Drying conveyor
- Centrifugal spin dryer

Applicable Materials

Quinoa seeds, Sesame seeds, Oats, Wheat

Performance Specifications

Operational Advantages

- Low noise pneumatic hoisting
- Minimal seed breakage during handling
- Integrated light leaf and broken skin removal
- Efficient sand removal via gravity washing

Construction & Design

Material Composition

Stainless Steel

Control & Utility

- Compact floor area design
- Control panel with indicator lights
- Multiple water inlets and outlets
- Adjustable drying solutions
