

QWERTY Keypad Feature Phone

This compact mobile phone features a QWERTY keypad and a color display. The device is designed primarily for calls and text messaging, with a focus on ease of use and portability.

Overview

Compact Dual-Mode Connectivity

This QWERTY keypad feature phone offers a practical and robust solution for users needing reliable communication on the go. Featuring a unique GSM+CDMA dual-mode design with triple standby capability, it allows for simultaneous use of two SIM cards and one UIM card. Its compact, lightweight form factor and essential multimedia features make it an ideal choice for professional or personal use where simplicity and portability are paramount.
