

R-134a Refrigerant Compressor

This hermetically sealed compressor is designed for R-134a refrigerant, making it suitable for refrigeration and air conditioning applications. It features a robust motor and optimized compression system for efficiency and longevity in demanding environments.

Overview

High-Performance Refrigeration Solution

This hermetically sealed compressor is specifically engineered for use with R-134a refrigerant, making it an ideal choice for refrigeration and air conditioning applications. Designed for demanding environments, it features a robust motor and an optimized compression system to ensure high efficiency. Its durable construction guarantees reliable performance and longevity, providing a dependable solution for professional cooling needs.

Technical Specifications

Key Features

- Robust motor design
- Optimized compression system
- Durable construction for long service life

Refrigerant Compatibility	R-134a
Design Type	Hermetically sealed
Suitable Applications	Refrigeration, Air Conditioning
