

R134a Low Back Pressure Refrigerator Compressor

This compressor utilizes R134a refrigerant and operates under low back pressure (LBP) conditions. It offers high efficiency and is suitable for use in refrigerators and refrigeration equipment.

Product Overview

High-Efficiency Refrigeration Solution

This low back pressure (LBP) compressor is engineered for optimal performance in refrigeration equipment, particularly beer cabinets. Utilizing R134a refrigerant, the unit ensures reliable cooling efficiency and stable operation across international power standards. It is designed to meet the rigorous demands of modern refrigeration systems, providing both durability and energy-conscious performance.

Technical Specifications

Model Variants

- ADW153HV
- ADW163HV

Refrigerant	R134a
Application Type	Low Back Pressure (LBP)
Voltage/Frequency	220-240V~ 50-60Hz
Phase	1PH

Certifications

Certifications
