

R134a Refrigerant Hermetic Compressor

This hermetically sealed compressor is designed for refrigeration applications using R134a refrigerant. It features single-phase operation at 220-240V~50Hz, thermal overload protection, and a suction connector.

Product Overview

High-Efficiency Hermetic Cooling

This hermetically sealed compressor is specifically engineered for systems utilizing R134a refrigerant. It is designed to provide high cooling and load capacity while maintaining low noise levels for residential and commercial environments. The unit features reliable low-voltage start-up capabilities and comprehensive thermal overload protection to ensure longevity in demanding applications.

Technical Specifications

| | |
|------------------------|--|
| Compatible Refrigerant | R134a |
| Power Requirements | 220-240V ~ 50Hz |
| Phase | Single Phase |
| Safety Features | Thermally Protected, Suction Connector |
