

R134a Refrigeration Compressor

This hermetically sealed compressor is designed for refrigeration applications using R134a refrigerant. It features robust construction for durability and efficient performance and is suitable for use in refrigerators, freezers, and other cooling systems.

Product Overview

High-Efficiency Refrigeration Solution

This hermetically sealed compressor is engineered specifically for refrigeration applications utilizing R134a refrigerant. Its robust construction ensures long-term durability and consistent, efficient performance across various cooling systems. Designed for reliability, the unit operates with minimal noise and vibration, making it an ideal choice for refrigerators and freezers.

Technical Specifications

Refrigerant Compatibility	R134a
Design	Hermetically sealed
Suitable Applications	Refrigerators, Freezers, Cooling Systems

Features

Key Performance Features

- Robust construction for enhanced durability
- Low noise operation
- Low vibration levels
- Includes mounting brackets for easy installation
