

R134A Refrigeration Cooling Compressor

This single-phase refrigeration compressor is thermally protected and utilizes R134A refrigerant. It is designed for reliable performance in various cooling applications.

Product Overview

High-Efficiency R134a Cooling Solution

The PW2.0VK is a high-quality refrigeration cooling compressor engineered for versatility and reliability. Featuring a 100% copper motor, it ensures long service life and low noise operation for various water dispenser applications. Its robust design provides consistent performance with a focus on high-efficiency heat exchange.

Technical Specifications

Performance Metrics

80 W Cooling Capacity	0.91 W/W COP Rating	0.7 A Running Current
---------------------------------	-------------------------------	---------------------------------

Supported Voltages: 110V, 127V, 220V, 240V

Refrigerant: R134a

Logistics & Packaging

Container Load Capacity

Container Type	Quantity (pcs)
20' FCL	6000
40' FCL	13000
40' HQ	16000

Gross Weight per Unit: 6.4 kg
