

# R134a Refrigeration Low Back Pressure Compressor

This R134a compressor is designed for refrigeration applications with low back pressure. It is suitable for merchandisers and refrigeration equipment.

## ADDITIONAL IMAGES

## Product Overview

### Professional Grade Refrigeration

This low back pressure compressor is engineered for optimal performance in demanding commercial refrigeration environments. Designed to operate efficiently with R134a refrigerant, it provides reliable cooling for merchandisers and professional refrigeration equipment. The robust construction ensures durability, while the dual-frequency design offers versatile compatibility for international electrical standards.

## Technical Specifications

Refrigerant	R134a
Application Type	Low Back Pressure (LBP)

## Electrical Requirements

Voltage Range	220-240V
Frequency	50/60Hz
Phase	1PH

## Certifications

Certifications  
CE • CB
