Product Overview

Professional Grade R20 Dry Cell Battery

This R20 dry cell battery is designed for consistent and reliable power in a wide range of household and professional applications. Featuring a durable PVC jacket construction, it provides effective protection against leakage and corrosion. The battery offers stable 1.5V output, making it ideal for devices such as flashlights, gas water heaters, and portable electronics.

Technical Specifications

Nominal Voltage	1.5 V
Discharge Load	3.9 ohm
Discharge Duration	250 - 750 minutes

Construction

Design Features

- Top plastic cap
- Bottom iron sheet
- Color cylinder design

Casing Material	PVC Jacket
-----------------	------------

Usage Information

Recommended Uses	Flashlights, Gas water heaters, Gas stoves, Radio power supply
------------------	--

Safety & Compliance

Handling Precautions

- Do not dispose of in fire
- Do not recharge
- Do not mix with used or other battery types
- Do not install backwards
