

R22 Refrigeration Manifold Gauge

This manifold gauge is designed for measuring pressure in refrigeration systems. It features a special anti-collision sheath and a high-precision pressure gauge.

Product Overview

Professional R22 Refrigeration Manifold Gauge

This R22 refrigeration manifold gauge is engineered for high-performance HVAC maintenance and diagnostics. Featuring a high-precision gauge with class 1.6 accuracy, it ensures reliable measurements for both high and low-side pressure. The unit is built for durability in demanding work environments, incorporating a metal-embedded valve design and an anti-collision sheath for enhanced longevity.

Technical Specifications

Supported Pressure Units

MPa • kg/cm² • PSI

Accuracy Class	Class 1.6
Hose Diameter	12 mm
Compatible Refrigerant	R22

Design & Construction

Construction Features

- Special material anti-collision sheath
- Metal-embedded valve design
- High-strength rubber tubing
