

R26 Slurry Pump Rubber Liner

This rubber liner provides abrasion and corrosion resistance. It is made from hard alloy metal or rubber, depending on the specific application.

Product Overview

Industrial Slurry Pump Protection

The R26 Slurry Pump Rubber Liner is engineered to provide superior abrasion resistance and corrosion protection for high-performance slurry pump systems. Precision molded to ensure a perfect fit, these components effectively safeguard the pump casing and internal parts from the wear of demanding industrial applications. With options for natural rubber materials like R08, R26, R33, and R55, these liners are designed to extend service life and maintain optimal pump efficiency.

Technical Details

Material Composition

R08 Natural Rubber, R26 Natural Rubber, R33 Natural Rubber, R55 Natural Rubber, A05 High Chrome Alloy, A07 High Chrome Alloy, A49 High Chrome Alloy

Component Inventory

Available Pump Components

- Throat Bush
- Front Liner
- Back Liner
- Wear Plate
- Volute Liner
- Impeller (Open/Closed)
- Shaft Sleeve
- Expeller
- Bearing Assembly
- Stuffing Box
